General Excellence

The stamp of popular approval has been placed upon the Bullard Automatic Wrench because it is the Mechanic's, the Steam and Gas Fitter's favorite—

The Handiest For All Un-get-at-able Places

We've made it stronger than is necessary—of the highest grade of drop-forged steel—jaws of best tool steel—to be equal to the toughest job of any mechanic.

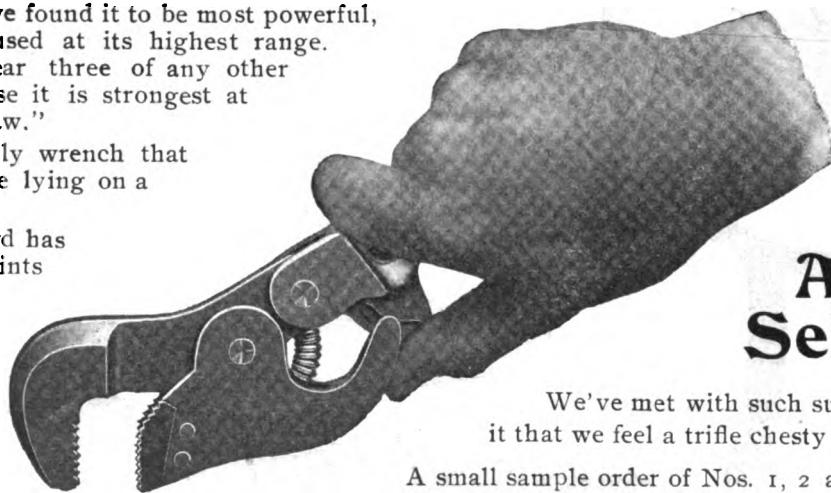

The Bullard Automatic is equal to any emergency.

Expert Mechanics Depend On It

They have found it to be most powerful, even when used at its highest range. It will outwear three of any other make, because it is strongest at the upper "jaw."

It's the only wrench that will turn pipe lying on a flat surface.

The Bullard has other good points—set forth in Catalog A.

A Fine Seller

We've met with such success in selling it that we feel a trifle chesty over the result.

A small sample order of Nos. 1, 2 and 3 will convince you of your profits in handling the Bullard.

Catalog A gives you all the facts. Get it to-day.

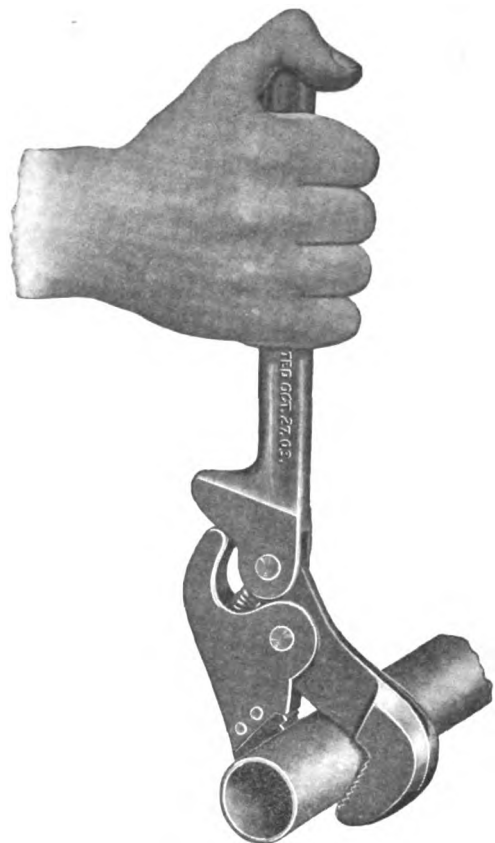

Bullard Automatic Wrench Co.
